

Anesthesia Xpress Solutions

Anesthesia Xpress is a cost effective, easy to use set of solutions for outcomes and quality indicators collection, analysis and reporting. No additional capital investments or IT infrastructure is required. Anesthesia Xpress tool was specifically designed and developed for anesthesia/OR quality improvement initiatives.

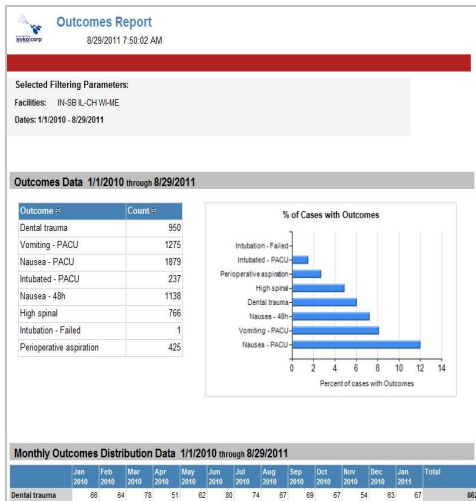

FEATURES OVERVIEW

QUALITY INDICATORS AND OUTCOMES MODULE

- Anesthesia Xpress allows the clinician to enter data at the point of care on a workstation, laptop, tablet computer, smartphone or paper form. Regardless of the type of data entry chosen, paper or web, you will have 24/7 access to your Web based database.
- Fits into existing paper-based or electronic workflows.
- Has the ability to capture key quality indicators recommended by ASA and AQL. Pre-defined forms can be easily modified to include specific data the practice would like to collect.
- Total customizability by the user. New quality indicators and custom fields can be easily added by the user.
- Sophisticated data export and import routines allow effortless transfer of data to most of the common data formats.

PATIENT SATISFACTION SURVEY MODULE

- State of the art hosted solution for assessment of patient satisfaction administered after surgery or once the patient has returned home.
- Multi-mode data collection: Provides the flexibility to use any combination of workstations, laptops, PDAs, tablets, smartphones, iPhones or iPads, the web or paper to gather information.
- Independent from your organization's IT systems.
- Fast: Creates surveys & polls in minutes.
- Easy: Customizable questions (Yes/No or scale type) or select from already created templates.
- Real-time: View your results as they are collected in real-time using our reports.

COST EFFECTIVE

- ✓ No IT support onsite necessary
- ✓ Fast and easy implementation
- ✓ Easily interfaces with existing systems

EASY TO USE

- ✓ Data is entered at point-of-care
- ✓ Easily customized
- ✓ An exhaustive list of included standard reports

SECURE AND FLEXIBLE

- ✓ Hospital IT system independent
- ✓ Hosted by your institution or by EVKO in a SaaS model
- ✓ Secured servers monitored 24/7
- ✓ Data backed up daily
- ✓ Supports the latest hardware and technology including WiFi and Tablet PCs
- ✓ Securely stores data in either a Microsoft SQL Server or any database selected by your practice

Outcomes Data Entry

Main Case Data PreIntra Op **Outcomes** Patient Survey

Outcomes

Outcome	Selection	Notes
Cardiac Arrest 24h	<input type="radio"/> Yes <input checked="" type="radio"/> No	
Cardiac Arrest 48h	<input type="radio"/> Yes <input checked="" type="radio"/> No	
Coma	<input type="radio"/> Yes <input checked="" type="radio"/> No	
Death 48	<input type="radio"/> Yes <input checked="" type="radio"/> No	
Epidural Hematoma	<input type="radio"/> Yes <input checked="" type="radio"/> No

AQI INTEGRATION

- Provides a mechanism for our clients to submit data to the AQI registry. EVKO's Anesthesia Xpress can report on all AQI data elements.
- Provides a set of components for interfacing with dozens of third party medical record systems, billing systems and third party registry systems.
- Your practice does not need IT support staff to submit data to AQI. EVKO will handle monthly, or quarterly uploads to NACOR, and will perform all checks and updates.

REPORTS

- Anesthesia Xpress comes built-in with the most common reports our customers need. Unlimited custom reports can be created per customer request.
- Run quality reports on all of your sites, providers as well as individual indicators.
- Reports are generated utilizing the 2011 version of Microsoft Reporting Services (SSRS).
- Examples of the reports available:
 - Patient satisfaction reports by provider and facility.
 - Distribution of cases with events/outcomes by provider.
 - Distribution of cases by top primary CPT code assigned to the procedure.

BENEFITS

- Solve your quality and outcomes data collection, reporting and analysis needs.
- Demonstrate quality of care to third parties.
- Immediate and accurate response to request for outcome data.
- Identify potential areas for improvement.
- Track patient satisfaction through patient satisfaction surveys administered after surgery or once the patient has returned home.
- Produce outcomes reports following society and state domains.
- Increase the opportunity for communication of best practices; increase research on quality measurement and improvement.
- Enables you to meet Joint Commission and other regulatory requirements for OPPE, FPPE and ABA requirements for MOCA.
